

# Instruction for Vector Optics Longbowman Flashlight

## Technical Specification

Model	SCFL-04 Longbowman
Output / Brightness	350-420 Lumens
Bulb	CREE LED (white luminescence)
Body Material	6061-T6
Cup Material	PC material glass and metal reflector
Housing Diameter	25.4mm
Head Diameter	55mm
Focus system	Pre-set long range
Weight (net)	260g (9.2 ounce)
Voltage	7.0-9.0V
Color	Titanium black
Battery	2 pcs 18650 & 1 pc 16340 rechargeable lithium
Switch	Wire Cable and On/Off Switches

- Two usage with different length:
  - 220mm version (8.7 inch, with on/off switch, two pcs 18650 style)
  - Remove the end detachable tube insert one 18650 and one 16340 battery, the length will be shorten to 185mm (7.3 inch, check the picture shown)

- ASR----Anti Shock Reinforcement
- Set including:
  - High quality nylon holster
  - Button on/off tail-cap switch
  - Wire cable switch
  - Tactical barrel weaver mount
  - Two pcs of 18650 and one pc of 16340 Lithium chargeable 3.7V battery
  - Normal 110-240V AC charger and 12V DC vehicle plug adapter

## Brief Instruction for Charger

- Fit 3.6-3.7V lithium chargeable battery (Set level to 4.7V) and 3.0V lithium chargeable and 1.2V Ni-MH / Ni-CD battery (Set level to 3.7V) etc
- Automatically identify different types of battery
- Auto shut-down after battery full charge
- Universal AC range from 100-240 , DC from 12-24V
- Insert the battery in the first slot if only charge one battery
- Red Light On indicates fast charge mode; Red light Flash indicates slow charge for the battery with low capacitance and high resistance
- Attention: Do not insert the battery in wrong direction. Do not charge different types battery simultaneity. One slot is only with one battery charge.
