

Customize Your Ar15 with 3D

All the time, marksman like to customize their guns. Most popular platforms are the AR-15 and the Ruger 10/22 rifle. The law on firearms is in force in many areas. Many accessories have been strictly regulated, but most riflescopes and handguards are not among them.

Marksman wants his rifle to be unique. Adding stickers to a standardized product is a common practice. But we, Vector Optics, will choose to use 3D technology to help our clients. Our R&D department now is waiting for your great minds and ideas to make them come true.

What's your options on to customize your rifle? Comment on this post on either Facebook or Instagram.
