

PRODUCT INTRODUCTION

Please refer to user manual carefully before using

1. Application of quick release plate

Release the quick release plate, loosen the locking knob. Align the screw hole of your device with the 1/4" screw on the quick release plate (or use a 3/8" adapter nut if necessary). Tighten the screw on the quick release plate. Attach the quick release plate back onto the clamp of your ball head platform and secure it.

2. Picatinny rail installation

Loosen the locking knob on the quick release plate and remove the plate. Insert the Picatinny rail device into the slot. Tighten the locking knob to secure it.

3. Using the main lock knob

- 1 Rotate the main lock knob anticlockwise to release the ball head, allowing you to adjust the device in various angle.
 - 2 Rotate the main lock knob clockwise to lock the device in place.
- The maximum vertical adjustment angle is 90°.

4. Mount the ball head onto the tripod

- 1 Tighten the panning base knob clockwise to prevent the bottom of the ball head from rotating.
- 2 Align the ball head screw hole with the 3/8" nut on the tripod and tighten clockwise to secure the ball head to the tripod.
- 3 Loosen the main lock knob, adjust the device angle until the bubble level is horizontal, then tighten the main lock knob.
- 4 Loosen the panning base knob to allow for horizontal rotation adjustment.

Load Capacity:

RSRH-01DC: Maximum payload of 20kg

RSRH-02DC: Maximum payload of 30kg

Exceeding these weight limits may compromise the stability and safety of the ball head.
