

RARE WINNING PERFORMANCE 1-8X26 FFP RIFLESCOPE

Greeting from Vector Optics and we can help sharing one rare Artemis 1-8x26 First Focal Plane riflescope with you.

Every 1-8's riflescope looks pretty similar in the market. This time Vector Optics bring a totally different choice for 1-8x riflescope. Long eye relief, 1/10 MIL adjustment, tactical lock turret, removable power throw lever, high end flip-up caps & 35mm picatinny mounting. Besides these features, Artemis has some unique advantage.

1. First Focal Plane. First focal plane reticle can be used at all magnification settings.

2. 35mm Monotube is designed for heavy recoil firearms and tested on 50 BMG.

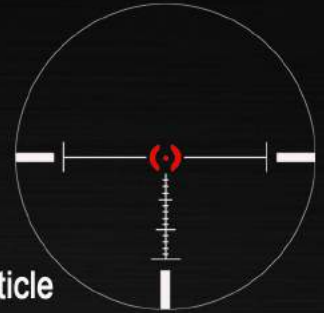

3. Compact Style. Only 9.9 inch, this is Artemis' length. Unbelievable!

4. Red & Night Vision Illumination. Illumination include 8 levels red and special 3 levels NV.

5. Super Clear Image.

Artemis uses etched glass VTC-1 MIL style reticle

Whether you hunt, shoot professionally, push the limits of middle-long range accuracy, or take your Vector Optics into harm's way, you need only be concerned with the brilliant image you see through it.

You can rest assured we've taken care of everything else
